Month and Days of the Week Sketches

Retinal Variables used will be color, hue, value, position, size, and orientation.

30 Days

Monday Inner/ Sunday Outer

Day12

Retinal Variable used for color AM / PM and a of color gradient for progress throughout the year.

Here is an Idea/Sketch to possibly add another dimension of depth and make this 3D to add a solar system quality to it. Experimental trial using WEBGL in the createCanvas.

As the time moves along the spiral it goes from seconds to the age of the universe. Retinal variables used in this case will be position, hue/color, Size.
