Sketches/Charts of [A Thousand Suns Data](#)

Sketch is based off of the S&P Daily Closing Data (week prior, week during, and week after), and the Nuclear Testing Data for top 20 Atmospheric Nuclear Test from USA and USSR 1952-1962. I worked to sketch how I might put two stories together, despite their not being correlated. Still in development for the final project.

This exercise showed the day of the week the bombs were dropped.

This graph maps the S&P Data in Daily Closing Dollars to the Dates of the bombs dropping for each atmospheric nuclear test.
